

## APPENDIX B: CAMP PROJECT PLANNING PRINCIPALS

The seven basic principles used in the CAMP Project to ensure the long-term value of the end product to both the agency and the public stakeholders:

- 1) **Park management plans use a statewide format:** For efficiency and consistency among park management plans, State Parks has standardized management plans to include information that is applicable throughout the agency and a standard format for presenting park-specific information.
- 2) **Members of the public participate in development of park management plans.** Directly involving park stakeholders in producing and revising plans fosters better understanding of how their particular interests fit into the larger resource management context, while also giving them a stake in the plan's success. Public constituencies should be encouraged to participate in management planning both during the initial CAMP planning process and thereafter during annual open house meetings at the park.
- 3) **Park managers and park staff play an integral role in producing and revising park management plans.** Participation by park staff in planning is an essential part of ensuring that staff responsible for implementing this plan has a vested interest in making it succeed.
- 4) **Park management plans are the primary documents for communicating park resource management information.** Plans should be written to communicate clearly and concisely stewardship-related issues -- and the steps the agency should take to resolve them -- to the rest of the agency and to the public.
- 5) **Key administrative functions are incorporated into the park management planning process.** To ensure that park management plans are kept up to date, a process for proposing and justifying park capital and operating program requests has been incorporated into the management planning process.
- 6) **The Director approves park management plans.** Park management planning is an on-going process and plans should never be considered finished. Plans should however be considered "mature", ready to be published, and acted upon when they have been reviewed by the agency and approved by the Director or his/her designee.
- 7) **The review and approval process for future plan revisions will remain flexible.** After initial park management plans have been approved subsequent environmental, social, and political changes will necessitate that plans be revised. To ensure that revisions don't become mired in lengthy full agency review, a variable level approval process should be used. Staff at each level of the agency – park, region, division, and directorate -- must make a critical judgement as to whether a proposed plan revision requires review and approval at the next higher level.
