

Vascular Plant List for Seaquest State Park

A total of 189 vascular plant species were identified during the 2006 surveys at Seaquest State Park. Of these, 60 of the plant species are non-native, accounting for 32% of the total.

Key to Vascular Plant Species List

“Code”: Four-letter plant code as shown on the USDA PLANTS database.

“Alien?”: species that are not native to the park are indicated with an “a”

“Status”: Current status listings for WA DNR NHP tracked rare plants. See Appendix B for definitions of Status rankings.

“Common Name / Accepted Synonym”: The species list uses Hitchcock and Cronquist, *Flora of the Pacific Northwest* as the taxonomic authority, as this is still the standard reference for our area. Updated nomenclature or general common names are shown in this column when they exist.
