

Accessibility Survey

What program activity or facility improvements would best promote accessibility to Washington State Parks programs, services, and facilities?

Answered	437
Skipped	242

Respondents	Responses
1	More ads camping areas
2	If you provide program, Sign language interpreter would be good for the deaf. braille or talking device for the blind would be good to have. pave trail for electric chair, scooter, or wheelchair would be good to use
3	Water and beach access and Ada trails
4	Beach access, public restroom access, parking
5	Response to Q8 - I don't know, but I recommend having a community advisory council collaborate with WSP to review that important service. ;) <p>Q9. Parking, raised-platform tent sites, accessible yurts, accessible trails that extend several miles into nature, not just a 1/2 mile loop, accessible access to get into the water, wheelchair accessible day facilities.</p>
6	Accessibility to beaches
7	Please consider less visible disabilities. SPD impacts those on the spectrum as well as a lot of individuals who just have this disability.
8	Day hikes with a park ranger. Children and their parents or Grandparents would appreciate the time with their children.
9	some parks need more than 1 ADA campsite.
10	unsure
11	idk
12	Fishing
13	Trimming of tree branches hanging over roads and RV sites and removal of trees that have outgrown their space into sites. Also, making a wider entrance to pull through sites to eliminate driving on grass and sometimes sprinkler heads.
14	Camping, trails,

Respondents	Responses
15	<p>1. Anything that would improve access for those in a wheelchair. For my cousin, simply accessing a beach can be impossible.</p> <p>2. Making accommodations for those with sensory differences. For example, occasionally modifying events to reduce sensory stimulation.</p>
16	<p>Having better 'Reserved/Available' signs on each site post to make easier to see which sites are available for a one night stay and to keep me from having to get out of my vehicle to go to the kiosk in order to find the available spot list. Texas and US Forest Service have this done right.</p>
17	<p>support available within parks</p>
18	<p>Parks for children to play in.</p>
19	<p>Physical accessibility whether it is a restroom, flat camping area, access to beaches and easy trails really make our trips memorable!</p>
20	<p>Sewer systems</p>
21	<p>Make sure that parking areas and restroom facilities are accessible. Mark trails with access types and abilities. ie: wheelchair access, easy, medium or difficult etc.</p>
22	<p>More wheelchair accessible trails. Beach paths that accommodate wheelchairs and scooters or free motorized rentals</p>
23	<p>Access to lake or beach</p>

Respondents	Responses
24	<p>Continue to help your users educate themselves about our state places. Use your data and information about trails, elevations, conditions, weather, beach erosion, beach availability, waves, snow conditions ::you get me ?:: to educate users about the best way to enjoy the place. It is incumbent on users to enjoy our places safely and with in the means available to them. People should be able to self rescue, know their level of swimming or floating abilities ,and know their general out-in-whole-world ability level. I write this as a mobility impaired, service-connected veteran. Or better said as “a person who’s mobility is very different than it was 30 years ago.”</p> <p>And I still believe the people responsible for themselves first. This Evergreen State does a good job based on the facilities I’ve seen. More gentle education and in your face education of your users is where your money might be best spent. That and trying to keep down vandalism.</p> <p>I would like to see more education about tsunami safety along our coast lines. Something as simple as requiring people to park facing out in the parking lot so that if they have to evacuate they don’t have to back up with save lives in a moment if people are educated to do it every time. No amount of ability or disability needed. Keep doing good work. You are appreciated.</p>
25	Pathways allowing for wheelchairs. Parking - camping for accessibility wheelchairs
26	A reservation system that will accept reservations one year out.
27	The beach mats that go over the sand that provide access for wheelchairs onto the beach please!
28	None that comes to mind.
29	physical accessibility
30	Accessible entrances or no stairs
31	Trails to be accessible...at least some
32	Having signage in audio and Braille when possible.
33	Love your park system. thanks
34	parking,clean and usable restrooms and showers
35	Accessible paths to parks and trails
36	ramps, restrooms
37	Any and all
38	Improved walking areas such as beach access that are walking impaired friendly.
39	pioleted boats and fishing from thr boats.

Respondents	Responses
40	more designated parking spaces
41	Bike trail accessibility; campsite store equipped with basic essentials
42	There should be places to sit and rest everywhere, even if only a crude wooden bench. And make sure there is cell phone service for emergencies, everywhere.
43	Bathroom accessibility
44	Accessible restrooms, accessible paths, easier reservation service and better informed personnel.
45	Meeting rooms needed
46	Park or ranger led scheduled boating rides for disabled. Activities that are family friendly for all including disabled people. Something special for children that are disabled. Swings with belts. Merry go round with little seats. Etc. Small slides with high sides. I dont know if any of it would work. Just suggestions. I drove school bus for 26 years. Many of those years were for special needs children and adults. There is a real need.
47	Trails accessible to manual wheelchairs, which are different than trails accessible to power chairs and scooters. Manual wheelchairs cannot traverse pea gravel nor bumpy terrain. Restrooms need power door openers. Wheelchair users (both manual and power) must either kick the door open or ram their scooter into the door to enter the restroom.
48	Longer parking pads at disabled campsites to accommodate the increasing length of RV's.
49	More accessible trails in each region.
50	Maybe try and advertise open houses or group hikes for people who have never done these kind of activities
51	The increasing need for parks department and parking are so necessary today.
52	More wheelchair accessible trails. Make sure trails can be accessed by wheelchairs (wheelchairs can't get through bike/ATV batteries), and make sure restrooms are all really accessible (not only a truly usable grab bar and big stall, but also level access and not surrounded by loose gravel. In general, gravel is bad). Make more picnic tables for wheelchairs. Access to lakes via beach mats, etc
53	Wagons for people with dexterity or mobility issues and walkways (including through parking lots) and over beach areas.
54	More wheelchair accessible yurts and cabins
55	Pave campground sites and roads; increase width of accessible parking sites to include 8-foot width protected loading areas; add designated handicap parking for full-length (40-45 foot) RVs; pave as many trails as possible with asphalt or packed dirt (such as dolomite, which packs densely) to a width of five feet for wheelchair access wherever possible.
56	Monitoring handicapped parking: there is a lot of abuse but you can't call people on it.
57	More assistance for the disabled when fishing or camping in State parks.

Respondents	Responses
58	rest rooms showers and parking for the rest rooms
59	Youth assistance in summer to provide challenged or otherwise abled patrons to enjoy the parks and trails by appointment. pay youth at min wage for summer work.
60	more handicapped access cabins, yurts.... accessible docks
61	paved entries for wheel chairs
62	Visibility is important if there are no staff around. Provide training to volunteer camp hosts to be familiar in how they can help us.
63	Making spaces accessible means far more than meeting ADA guidelines - access needs vary greatly and there are many people with disabilities who do not use wheelchairs. Improved signage, information, and training staff and volunteers on disability and access needs would promote accessibility.
64	Fish cleaning areas, docks for fishing & boating there are many but not all parks have them.
65	I would like to see walk areas wider to allow for easier passing. I would also like to see maintained trails
66	Emergency response services
67	ADA Camping spots should all have full hook ups. Most of us need electrical and water.
68	phone system- if network isn't great - how can I contact emergency because I'm deaf.
69	Making trails more accessible by providing benches to sit and rest, handrails in steeper areas with stairs, help for people in wheelchairs, or mobility issues.
70	Add captions to videos, provide sign language interpreters for programs.
71	access
72	Fishing and camping
73	More ramps, more handrails.
74	Improvements to Shafer State Park facilities please.
75	Repairs and improvements to campsites. Many of Pacific Beach grassy campsites are worn down even to the point of flooding. Muddy paths to and from your camper. Maybe fill with gravel to drain properly and avoid mud.
76	More disabled camp spots, and discounts for camp sites, cabins, yurts.
77	Changing and diapering family rooms designed for over sized children 3-5 ft (50-100 lbs.)or disabled adults to care for personal or special needs while visiting parks. For those unable to stand or walk so that caregivers can help care for these ones and not have to leave the beach or park to care for special needs. Should have handicap hand washing sinks, toilet designed for disabled with grab bars and solid sturdy changing table or bench 6ft long that can be wiped easily with disinfecting wipes. With room to navigate push chair or wheelchair.
78	Designated handicap spaces with pull-through sites, close to restrooms and trash sites.
79	Clean showers

Respondents	Responses
80	I think the Washington State Parks are doing very well with everything. More parks would be great like the Miller Peninsula park property getting developed. But you are not going to get the \$ without more funding, I know that battle all to well.
81	more powered sites
82	Ranger Talks or lectures
83	Playgrounds for special needs children and adults
84	Provide more dump stations throughout the facilities/parks.
85	More concrete/asphalt areas around RV spots. Makes rolling easier
86	More training for employees who check you into your site. I'm young and get questioned all the time even though I have disabled plates, a placard, my disabled card and everything is in order. Some sensitivity training might be helpful. Especially at Fort Ebey. Just to get through the "gate" to go down to the parking lot, its demanded that you show your pass. I explain I am a camper and I have to drive I cannot walk to the parking lot. And, I dont need a pass. Still, I've been denied. Its irritating and makes me feel like a criminal. Overall, I love Washington State Parks!
87	Availability of accessable camp sites. For larger RVs
88	WIFI service to the camping areas
89	Trails that are wheelchair accessible.
90	Better drainage in campground when it rains
91	Better Bathrooms and showers. Some parks are great in that respect others are quite lacking.
92	Camp sites that are close to unloading areas. Many places like Chelan the best sites I can't use because of the distance so I am stuck with the less desirable sites.
93	The bathroom's. My adult daughter is disabled and having to have the door open when using the toilet to wipe her is unacceptable she's 20, there should be at least 1 stall that's ADA accessible.
94	Everything's been great
95	Camping?RV sites availability.
96	Keep restrooms clean and safe
97	The road going into the camp sites at Ocean City needs to be repaired.
98	Less ability to cheat the reservation system we try to access system on day of earliest date only to find every thing all ready booked out
99	More wheelchair accessible trails with adequate accessible parking
	As for #8 I've never used/seen the service in action
100	Parks with historical buildings should have more workers/volunteers.
101	At Manchester specifically I couldn't use the picnic area because the disabled parking area was way to far away.

Respondents	Responses
102	Not sure right off.
103	more paved trails
104	There are still too many barriers in most parks. Here is a recent and a commonly found problem. When you close a gate to block vehicular traffic, but allow pedestrian access, you also block people who use wheelchairs. Oftentimes, it would be an easy fix; by cleaning brush and/or compacting some gravel at one end of the gate.
105	More ada camp sites please. But still very important to have a campfire pit please!
106	Beach pads so that wheelchair users can get closer to the water are so great.
107	unsure @ this time but get rid of the \$30 discover pass as we no longer visit where its required
108	salt water parks camping fishing
109	Better WiFi capability throughout the state park system.
110	Please make fish Washington more accessible on the IOS with voice over screen reader.
111	Wifi access
112	Paved path cpsite to restroom
113	clean restrooms that dont have mold on the walls I believe it is a state law for all public facilities
114	WIFI,FOR TO TAKE CARE OF PERSONAL BUSINESS OR EMERGENY, CELL SERVICE AT GRAYLAND IS WEAK
115	The bathrooms, hard to get in to. The door is often hard to open (heavy) there is also not enough space in the shower for people with a disability who rely on a wheelchair or need assistance. Also some state parks have very uneven roads with bumps in it. This makes it hard for wheelchairs and a tripping hazard for people with limited mobility.
116	There are not enough ADA sites with "dry slabs" or "dry areas" for picnic tables. When visiting our favorite park (Grayland Beach) we have very few choices for ADA sites, and only one site is ADA with concrete for the picnic table...and it is under water when it rains.
117	Docks for boat launches
118	More parks with full hookups for RV's and more improved boat launches and fishing docks.
119	wheelchair accessibility onto beaches and trails
120	covered picnic areas

Respondents	Responses
121	Have accessible campsites with hookups. If someone who needs oxygen wants to camp (in RV) there is no way for them to use an oxygen unit which uses electricity to provide oxygen. Most of the sites are back in, perhaps difficult for some people to do. You need to use someone who has disabilities to help you design or determine which sites will work for someone with disabilities, not an able bodied person who has not had to deal with a disability. Even accessible bathrooms are not really accessible when a person cannot open a door or get over an uneven concrete entrance to a restroom. Most state parks are better than many of the national parks on all fronts, but our state parks still lack a lot of insight in setting up most of the facilities they operate simply because a person who has not had to deal with problems getting around cannot truly understand the needs of people with mobility difficulties or other disabilities.
122	A better, more fair reservation system where frequent fliers can't book up every stinking weekend during camping season. Possibly limit number of camping reservations to 2 or 3 per season?
123	Better maintenance on sites. Fewer aggressive rangers.
124	Emergency phones or buttons for the camp grounds that have limited cell service. Obviously it would need to be setup so kids can't play with them. Designed camping spots for those who have disabilities that may require special attention or that has special needs or requirements.
125	Some paved trails for wheelchair access and for people who have stabilization issues.
126	More than 1 or 2 ADA sites. Hard to reserve due to limited accessibility at all State Parks.
127	More Boat ramps, more electrical outlets on camping site designated for Rv's, site pads labeled, needs improvement online internet's speed.
128	Paved pathways and camping areas, nature trails
129	Better sidewalks to the Lake in the camping area if your in a wheelchair you cannot get to the waterfront to go fishing.
130	Improve ground facilities ie: trees, sewer and grass area at sites.
131	(1) Better ADA campsites. ADA sites are often the worst, least private, closest to trash and restrooms of any site in the park. We enjoy the same things as other people!! Do not consign us to the ugly sites. (2) ADA restrooms with dedicated and usable ADA stalls! Old, converted stalls are not usable! and other people usually choose the ADA stall. Hey, we need to poo too, please don't use our stall as it is often emergent!
132	Winter utilities, water fausets/loops, flooding of camp ,usable paths to bathrooms, cheeper reservation fees,
133	More wheelchair accessible trails
134	not sure
135	maybe more paved paths and more spots with power
136	?
137	You need more ADA campsites at the most popular parks. If you have ONE site, I don't call that accessible.
138	I think the Washington Park System is doing well. To bad that the our government stole the lottery money.

Respondents	Responses
139	More DAV campsites would be nice.
140	Let Washington State citizens have preferred access
141	More accessible camping sites with access to electricity.
142	wheelchair accessibility for fishing docks
143	more educational programs
144	<p>I think the presence of rangers is helpful. Many times the entrance buildings are closed at times during the day. Also the kids really enjoy interaction with the Rangers on their campground rounds. All in all we really enjoy our WA State parks and hope the great job U have been doing is still alive in the future for my great grankids, great, great and so on. It's my job to push legislation to ensure that</p>
145	<p>I would modify the rules. Park rangers interpreting laws and rules has to be the absolute most tyrannical thing ever. It's treason. Law enforcement interpreting and enforcing unconstitutional laws and regulations, with little to no protection for the citizens they are supposed to serve, will lead to some sort of repercussions. [REDACTED] That's blatant treason, and I swore an oath to the constitution, to give my life protecting this nation's citizens from that exact scenario. To protect this nation from enemies foreign and domestic. Law enforcement, enforcing unconstitutional law, taking people's kids because they don't like a person, has to be one of the the biggest domestic threats, if not THE biggest threat to American freedom to date. Stop turning your park rangers into that domestic threat. The revolution, will not be up for interpretation.</p>
146	wheelchair accessible walkways
147	Dock and bank fishing accessible would help.
148	improve the permit process.
149	sewer hookups for RV's
150	I would like more trails that are wheelchair accessible.
151	more and better handicap camp sppts
152	More disability camp sites
153	<p>Keeping all rest room working , several have hand driers out for years . More fixing areas for disability people to fish. Dock to small for more than a couple people</p>
154	updating the restrooms and shower areas , making them bigger (especially the showers)
155	Restrict public bathrooms in camping areas to campers—not homeless as we encountered last summer.

Respondents	Responses
156	Wider trails
157	Continued work on trails of various skill levels. Help people to get out of the parking lots and into the beautiful parks.
158	Trails
159	Flat camping spots
160	Childrens Programs
161	Most all camp sites need to be accessible not just one for every 10 or 30 .especially all asphalt or concret.when we go to cape disappointment rhere is only one in each circle when lol could be the same. At Lincoln rock up on top area there is only one in 59 sites. ??
162	Have more Handy Cap RV spots because having everything in front of your RV feels safer to enjoy and have easier assess in and out of my RV without leaving my door open to walk to rear or too far from my door
163	Don't know.
164	More sites available for both ADA and not just 2 or 3 per camp site
165	Make the disability sites some of the premium sites and all with water, power and sewer if possible since for many they do not have the ability to get to a restroom as often or as quickly as others.
166	More campsites, more parking, improved bathroom grab bars. Better bathroom up keep to prevent falls, ie wet floors around toilets, sinks. ADA sinks
167	Accessible yurts. I don't do a lot in state parks because I just assume inaccessibility. So maybe a resource collecting info on the accessibility features of the parks
168	more ada sites
169	Upgrade tables in camping area/picnic areas so wheelchair accessibility is consistent
170	Continuing with Access America Disability Pass and the discount the Pass provides at both State & Federal level.
171	Added campsites at parks.
172	maybe some more cabins
173	not sure
174	Free showers with key card access
175	disabled camp sites
176	Wheelchair ramps
177	Fishing priorities to fish like walleye and kokanee. Quit messing with what you want. No one likes trout
178	Wheelchair access trail to beaches. Then a place out of everyone's way to park and enjoy listening and watching the ocean and birds. If parked just before the beach sand and off the beach trail that would be nice.
179	More disability sites

Respondents	Responses
180	make sure all camp spots for the disabled have ELECTRICITY
181	Sorry, no comments to add.
182	Wider RV pads. More concrete to roll on. Fire wood easier to access.
183	Na
184	Reserving camping.
185	Clean and working bathroom And clean parks
186	More books and Brochures
187	Unsure
188	Take disabled people out on the water for an educational and recreational treat. Promote special nature programs specifically to the differently-abled community, like boating and trail walking/rolling with a special guide. Staff with volunteers to be cost-effective? Thanks for considering!
189	Better parking information-it gets confusing figuring out which parks need the discover pass vs which parks are just pay for parking vs which parks are city or county and are free-confusing!!!
190	Not sure never seen them in action!
191	More full hook-up sites
192	More and improved ada camp sites.
193	I think all are perfect.
194	wider camping spots for trailer. would love more accessible showers - accessible .changing places - see changingplaces.org
195	Paved trails
196	More RV spots
197	Make sure that the tent sites or motor home sites are close to the rest rooms and showers in all state parks
198	Help people be more aware of accessible beaches and trails
199	Fix South Whidbey State Park for camping
200	Installing beach access mats and making sure wheelchairs can get through the barriers designed to keep ATVs out.
201	fix broken sidewalks ramps in accessible parking overlooks and beaches and some trails need to be accessible
202	Internet availability in campground
203	None
204	Need more "full hookups" at parks.
205	Large-wheeled beach accessible wheelchairs for lending/borrowing, more cabins with wheelchair accessible entrance ramps, more paved trails, adult-sized changing tables in park restrooms, wheelchair accessible historical/interpretive/educational centers,

Respondents	Responses
206	more full camp sites
207	Make sure all toilet stools are as tall as is available. Have good paved trails to the restroom facilities.
208	More disability camping spots, perhaps designated for disabled Veterans only.
209	From what I have seen so far some of your best parks are missing adequate RV services for full hook-ups (50 amp service, septic, and water) simultaneously. More ADA compliant spaces need to be provided in parks. Spaces need to be a little bit wider and longer for wheelchair access to back of RV (toyhauler door). Why do you charge for a second vehicle for 8 person or more campsites? You know damn well, 8 people are not going to fit in one vehicle. Stop charging for second vehicles.
210	I wish there was cell phone service at Cape Disappointment but it's also to be out of touch. They do have a few landline phones to use, if I remember correctly - for emergencies.
211	More full hookups for RVs
212	hookups
213	Have more than one handicap camping site per park. Or have more sites that would be easier for handicap people. Things like flat areas on the utility side of the site with no vegetation. This aids in trailer set up for handicap people. Wider doors on restrooms for wheelchair maneuvering.
214	They need better bathroom facilities, more showers. More disabled shower facilities! Stop token operated showers!! Ensure bathrooms are cleaned!
215	No comment
216	Camping places for disabled
217	No suggestion
218	Not able to get premium campsites in the summer because I rely on phone service or slow internet. I am 100% DV. I have an exemption but that would not matter. I am willing to pay for the site if I were ever able to get one
219	Larger camping spots for handicapped people.
220	Walkway to the shorelines
221	More hookups for campsites.
222	Provide reasonable access to beach. Campfire talks. Camp site driveways cleared of sharp brush that encroaches the parking of RV or vehicle...Have reported problem in past, but problem ignored.
223	Well documented levels of accessibility for trails.
224	More resting benches for people who cannot walk far.
225	Have more grass so not walking in mud to hook up water and electric to trailer. Hard to walk in wet mud with a cane
226	Get rid of the contracted reservation system, they're idiots
227	A few more wheelchair accessible trails.. but without diminishing the natural beauty of wilderness areas.

Respondents	Responses
228	The bathroom/ showers at Bogachiel state park are awful. Took all my tokens and either shower didnt work or it was straight cold water.
229	As have written before, gender neutral bathrooms are important to us. That feature determines whether we can camp at that park.
230	More ADA sites at Lake Chelan 50 amp
231	Beach access.
232	Bicycle Trails
233	Larger restrooms Wifi
234	Make restrooms and water access more accessible
235	WIFI
236	i'm good
237	Nicer bathrooms and don't clean them in the early mornings when people need to use them. The one in the RV section has this problem so we drive to the restroom down by the water.
238	Better bathrooms and showers
239	More full hookups and showers
240	More large toilet stalls.
241	Wheel chair accessible trails
242	Making more trails accessible.
243	To allow disabled people, children to access and book camping reservations at no cost . To make more disability camping sites (lake Chelan has only 2) To make camping reservations more walk ins available
244	Disc on cabins for disabled..easier to camp in cabin
245	Would be better to have 2 disability stalls in each bathroom for the older buildings. For newer or those parks remodeling or building new again have more than one disability restroom- shower combination available
246	A speaker who is talking about visual input things.
247	Unknown
248	Better wheelchair access
249	Some of the park rangers
250	More ADA RV sites with and without hookups
251	I would like there to be a discount for disability offered on yurts or cabins because it's challenging sometimes to prepare and take my children camping on the ground.
252	More H/C camping spaces.

Respondents	Responses
253	maps and driving directions; lists of all amenities at each location
254	Keep enforcing rules for cleanliness and park laws so we can have restrooms at the parks cause a toilet needed or we have problems... thanks for the hard work out there!
255	More RV ADA sights and the ability to reserve year around at every park
256	I need generator or electricy for oxygen equipment
257	Don't know of improvements but just keep what we have
258	More wheelchair hiking trails.
259	Birch Bay really needs work on the RV parking, very tight entrys and access points, very narrow winding road. Really limits access. I couldn't use it. This is by far the worst I have seen.
260	a few more 60' rv pads.
261	better pathways, level, smooth
262	your doing a good job, maybe more camping spots
263	More disability sites Not charging family members to come and have lunch with someone who has already paid to camp
264	More paved trails
265	camping
266	Install emergency alert beacons the can alert local law enforcement officials.
267	The only issue my family runs into each year is making sure to reserve campsites early enough before the sites are all taken.
268	WiFi
269	Wheelchair paths and wheelchair accessible bathrooms
270	Put more into taking care of restrooms
271	Paved camp sites.
272	Better beach access . Piers for salt water fishing.
273	A few more handicapped spaces.
274	they did awesome thanks
275	Wood delivery by camp host.
276	They are fine now.
277	Paved trails with proper inclines to get on/off. Or at least hardpacked gravel trails. Family bathrooms with proper shower seating and a long handled removable shower head. Walking trails longer than 1/4 of a mile that are accessible.
278	Hard surfaces (asphalt, concrete)
279	more paved accesability for wheelchairs

Respondents	Responses
280	Disabled Veterans Access
281	toilet paper dispensers that I can look and reach into when the flimsy paper rips off short. I can't get down on my knees to resolve the problem.
282	More benches on trails and near beaches.
283	Better trails
284	I'm happy "as is"
285	More full service units for people with disabilities, including sewer.
286	Parks need a better program for accessing emergency services. With Rangers roaming the park every once in awhile and less in the evening, not knowing if when you have to dial 911 there is cell service. Deception pass is a good example of no cell service or in park phones to alert EMS. Some sort of EMS alert system in all parks would be beneficial.
287	Leaving the parks open for dry camping during the winter instead of closing them
288	Wheel chair accessible fishing.
289	Better lighting.
290	more camp sites just for handicap and being able to reserve hanicap sites
291	More disabled camping sites
292	More disability sites
293	Bathrooms
294	The biggest problem is rangers with bad attitudes. I have heard from many complaints about their jobs. Many have failed to help us with wheelchair accessibility problems like Fort Worden we couldn't register for our rental home until an able bodied camper found a ranger inside a inaccessible building. Not once in a 3 day weekend did we see a ranger outside or in an accessible location. The new unisex bathrooms are horrendous resulting in incontinence because I had to clean the toilet before sitting on it. That never happens in women only restrooms. But some campgrounds have even had the bathrooms locked all the time. It is obvious our state park system is totally dysfunctional.
295	Improve some of the campsites at older parks to allow easier set up for people with pickup / RV trailer combinations. It would be great if the water faucets for the dry camp areas were located on a map.
296	Garbage pickup after holidays
297	more accessible camping sites

Respondents	Responses
298	None. I have found that MOST of the disabled camping spots are almost always empty or occupied by non handicapped campers. You can't sacrifice the budget for a tiny population that may just not get to participate without family or community support in a regular campsite and supported by those they are camping with. I love the Washington Parks!!!! and I am disabled. Please don't spend a bunch of money trying to make crazy efforts for disabled and destroy our parks. Family and friends have to step up to support their disabled friends - NOT the state budget
299	Additional "level" reserve-able camping sites without on-site sloping RV or trailer parking..... Additional Accessible boat launch, piers, or docks.... Rangers enforcing quiet times and dog leash & barking rules.... Also enforcing loud boats on adjacent waters.... Otherwise, I consider the Parks are doing a pretty good job considering the low amount of funds they receive!!
300	You do a great job! Very happy!
301	Not having to make reservations months in advance
302	No comment.
303	More fell hook up camping larger size for large rv's. More host programs
304	Internet
305	More camping area
306	Keep the restrooms and showers up to date and working well. Thank you.
307	Clean parks with clean bathrooms and trash pickup. Look at British Columbia Canada parks. They are the nicest I have ever seen and we have been to most the parks in the United states
308	facilities
309	More ADA sites
310	I think the so-called upgrade "goingtocamp" actually made the search and reservation process for campsites more difficult and less user friendly. It can now be an onerous task to find available campsites across the state.
311	Wifi, but it's not that important.
312	level sites, or cement pads
313	Haven't noticed any problems so far.
314	We love the parks.
315	hosting / volunteering
316	Wider paved paths. less steep paths at mt Rainier and building aisles wider. better more restroom facilities for handicapped
317	Free Wi-Fi
318	Should be able to reserve any ADA site at a campground
319	My wife and I have enjoyed the park we have visited we look forward to visiting more of them. I think you do a good job of keeping your parks accessible.

Respondents	Responses
320	wifi. There's so others communication.
321	dont know. Safety for all users is important so a unniform monitored safety program would help all users.
322	Smooth cemented or concrete pathways, trails, and next to roadways. To allow all people access to all areas of the park.
323	Wi-fi
324	tsunami readiness
325	Camping and fishing
326	No idea. I did answer some of this above.
327	More campsites with easy access to fish in lakes for handicap
328	More Rest/shower rooms
329	Simple, basic campsites with graded pads for small RVs. More than one disabled site per facility. Site doesn't need to be full hook ups just level, concrete pad really helps.
330	Making available more camping sites that are more private. Also keeping trails easy and accessible for hiking and walking.
331	More ada campsites
332	Access to shore fishing
333	Make web site more user friendly
334	i finally give up on answering all of the question: 4 & 5.... answers kept going away, answered 3 times...
335	More handicapped camping sites
336	Trail and ramp improvements. Bulletin boards and other information placed lower for wheelchair users and people who are particularly short.
337	Better improved bath and shower facilities
338	At Ocean City state park the roads need improvement and fill added to many of the camp sites due to winter flooding.
339	more ada sites
340	Internet
341	Create more (temporary) handicap parking during high use time. More monitoring for violators in handicap spaces.
342	Fee waiver or discounts for ADA
343	Lower park fees.
344	Wheelchair accessible nature trails
345	paved wheelchair access 2 water/beaches
346	Level walking areas where walkers can be used and not run over by kids on bikes.
347	at checkin pass out information of such programs/or website

Respondents	Responses
348	It would be great if the campsites had a rolling registration were some portion opens up x months ahead, another portion 1 month out, and a final portion 1 week out. It is almost impossible to find a spot at popular campgrounds
349	Exceptionally well running and staffed now. You need more funding for maintaining the treasures you have
350	Since Washington State is so rainy, it would be well served to place gravel in some trails where foot traffic causes mud puddles to be created.
351	Rv parking
352	More disabled campsites
353	More camping sites
354	Handicap parking campsites, boat ramps and waterfront access,
355	Unfortunately WiFi.LOL
356	Don't treat it as a trendy program that's like Squirrel Awareness Week. I shouldn't have to hobble half a mile to the boat ramp. I shouldn't have to hobble around trying to find a bathroom so you can save a couple buck on signs and painting parking spots.
357	1.ADA trail access 2. ADA showers and restroom stalls
358	You do a great job as it is.
359	1) Wheelchair accessible paths to the beach! 2) More trails that are wheelchair accessible 3) More wheelchair accessible cabins and/or Yurts WITH BATHROOMS!
360	People with disabilities are low income individuals. I know we get discounts to camp but when we have to make changes to our reservations we should not be Dinged alot of money to do so, these fees almost make it impossible to book another reservation.
361	Better cell phone service for emergencies
362	24 hr. ranger availability
363	Large RV accessibility and more ADA sites
364	In campgrounds, more & closer restrooms. Better access at some campgrounds, lakes, etc. to boat ramps and swimming areas.
365	Cell phone service at all parks. The pay phones located in the parks are impossible to find in the dark, especially in an emergency.
366	Full services for motorhome.
367	information

Respondents	Responses
368	I find that most parks are disability friendly, it's the bank fishing access that seems to lack thought of a person with disabilities to enjoy the outdoors.
369	Wider trails so two or three can walk side by side.our son needs visual and motor support to walk but really enjoys the outdoors.
370	Not sure
371	More ADA campsites
372	More handicapped full service camping spots for rv's
373	More disabled camping sites and more WIFI campgrounds
374	Childrens handicap accessible playground
375	Accessible paths seem to always be in need of improvement
376	make waterfront more accessible (using docks/piers or easy beach access
377	Upkeep of what we already have which is so wonderful.
378	More ADA campsites. Level is important also.
379	Having full hookups would be nice at all parks. Having to dump black after the weekend is challenging
380	WiFi for sure
381	Relaxing the rules/laws regarding the use of medical needed electronic devices. So that you know i don't die on my sleep
382	I have no complaints I love our parks...just so much more crowded the last 20 years but it is good more young family's enjoying them
383	shower, bath in cabins
384	More handicap sites
385	accessability to trailer camping sites
386	More ADA locations with full hookups for RV and camp trailers
387	The geese poop covers the wheels of my wheel chair at Lake Sylvia and our Grandkids cant play around the benches and on the way to the beach. Also, on questions 4&5 I can't pick only one item
388	An easier way to navigate the website and more ADA designated camp sites especially full hookup sites for RV's
389	access to stream, lake fishing
390	Accessible bathrooms
391	wii
392	Upgrade restrooms
393	WIFI access points
394	More campsites for disabled families. Especially campsites that accommodate larger RVs or wheel chair vans.
395	Some people on disability cannot financially afford services or accommodations.

Respondents	Responses
396	Nothing really, I'm very happy with what you provide
397	Finish building the accessible docks at the Marine St Parks
398	Tall toilet at least 1 in each restroom...please
399	Always seem to have to call to make reservations
400	Add campgrounds. Maintain flora as best you can. Maximum (reasonable) size camp sites.
401	#1 issue is Physical safety from transients who use the bathrooms who are not registered with the campground. Disabled are most vulnerable. Need an issued keycard to use bathrooms to keep vagrants out.
402	?? I don't really know. Certainly the cost. So many things have gotten too expensive for some families to be able to use very often. I know it takes a lot of money to run the parks and keep them in good shape. And I hate to see ANY of them shut down. It's kind of a double edged sword. You need to money to keep them open and usable, but you don't want to make them inaccessible to people due to the cost.
403	Security
404	More handicap sites
405	A lot of retired people use Cape Disappointment. Handicapped persons can not make it down to the beach and in emergency situations you can not phone for help but would have to wait for a Ranger and try to get their attention.
406	Remote camping
407	A few more ADA RV sites at each park would be nice.
408	Better access to ADA restrooms, camp spots that are more premium rather than whatever spot is left. Free wi-fi, accessible trails.
409	There is too much smoke. Each space has a private fire pit. My wife lungs are in disrepair. Please eliminate these pits and have one giant pit so 25/50 people to enjoy. Please give this some thought.
410	More flat paths, walkways, trails.
411	Rule enforcement
412	Electric Bicycle Rentals
413	I am not sure. We like to venture on our own and make adjustments as necessary.
414	Bathrooms and more ada parking.
415	Improvemnt of walkways and access from all camping areas that have parking to other areas of a park, such as from Upper campground at Fort Worden to main facilities
416	More accessible paths and trails, access to beaches, wheelchairs do not work on sand and gravel.
417	Family ADA restrooms, ADA accessible trails (Wheelchair) , signage or audio for those who are blind,

Respondents	Responses
418	Using a universal accessibility approach /policy rather than just meeting the minimum ADA requirements. Look for ways to blend all the accessibility into the mainstream way of doing business and development of facilities so all of it is equal but not noticeable to the average user. example only one cabin or Yurt has ramp or 0 entry access while others have steps. thus only one is accessible and useable . All picnic grills and tables, benches are useable no matter where they are installed. give the ADA coordinator time and money to make some super accessible all inclusive parks with a model for accessibility for all parks to strive for. No different or off limits areas when possible without destroying park amenities or altering the setting.
419	Avoid steps where possible on trails. As a power wheelchair user I am less concerned with ADA specific grades/surfaces and more interested in just having wide enough dirt trails that lack stairs/steps for folks in wheelchairs to explore.
420	Increase community promotion- become more involved within the communities the parks are in or nearby. Park staff appear to be stand-offish and unapproachable to most people.
421	more access to scenic locations, use of beach chairs, trail riders, more handicapped washrooms that are unisex, sensory gardens
422	At every park, ensure presence of accessible parking/walkways, restrooms & trash receptacles.
423	More access to areas that are not accessible.
424	Easier access to fishing areas and sitting areas.
425	more accessible yurts, cabins, rentals
426	More access to trails, beaches and picnic areas.
427	Having adaptive activities which would be open and accessible to all (e.g. kayaking, biking, hiking with use of adaptive wheelchairs, etc.). Contact Outdoors for All to arrange a partnership event, where they could bring this type of equipment.
428	Heated shower buildings in the fall, winter and spring.

Respondents	Responses
429	<p>Trails to beaches on the ocean</p> <p>Bathrooms while camping... there one bathroom at Ocean Shores that tried to be ADA and failed. It's the small one by the RV park...</p> <p>What about bathrooms such as Rosevelt Beach that have basics such as a trash can on the way. Ugh... sometimes it's as simple as thinking about others mobility while other times it's age if infrastructure.</p> <p>Loop trails, such as Battle Ground Lake that could be ADA with some guidance</p> <p>Call together a group of moms and seek their advise rather than pay for a for profit to come in and tell you what needs to change. Typically they are the ones trying to change adult diapers in a less than desirable bathroom.</p>
430	Creating accessible trails is really important. They don't have to be long trails. Also displays need to have large print.
431	Updated restrooms
432	I like them the way they are, Slightly wild. Maybe just make sure there is access for wheel chair and Brail/speaking devices.
433	Online reservations!!!!!!
434	Better maps and photos of campsites. And much closer playgrounds to the camping areas
435	<p>The doors on many restrooms are not easy to open when in a wheelchair. You need an attendant. Not all restrooms are signed well to indicate if showers and stalls are handicap accessible. The caregiver often has to scout out the accessible units. Making sure that the handicap parking sites are close to the facilities and or sidewalks instead of across the parking lot, like at Sun Lakes day use.</p>
436	Trail repair and maintenance to keep trails level, clear, and accessible to those with disabilities.
437	Paved & slope compliant pathways and parking lots
