

Vascular Plant List for Ike Kinswa State Park

A total of 207 vascular plant species were identified during the 2006 surveys at Ike Kinswa State Park. Of these, 73 of the plant species are non-native, accounting for 35% of the total.

Key to Vascular Plant Species List

“Code”: Four-letter plant code as shown on the USDA PLANTS database.

“Alien?”: species that are not native to the park are indicated with an “a”

“Common Name / Accepted Synonym”: The species list uses Hitchcock and Cronquist, *Flora of the Pacific Northwest* as the taxonomic authority, as this is still the standard reference for our area. Updated nomenclature or general common names are shown in this column when they exist.
